### DTK-1660E

15.6-inch  
Pen Display for  
Business

#### Key Features & Benefits

**Outstanding performance and reliability** through proven, premium and market-leading digital pen display technology

**Superb ease of use** with no shrinking/scrolling when viewing and signing full screen A4 & letter-sized documents

**Low maintenance and long-life** thanks to the highly durable, scratch resistant writing surface

**Lower document fraud risk** through enhanced security and verification with state-of-the-art AES 256 / RSA 2048 encryption

**Flexible and comfortable usage** with the ability to switch between landscape and portrait mode to view and sign A4/letter size digital documents within business workflows

**Enhanced customer satisfaction** through the premium quality and highly intuitive pen and paper-like user experience

**Clean, clutter-free workspace** with simplified cable management through the 3-in-1 connector cable

**CINTIQ  
DTK 2260**

**DTC  
121W5Z**

## Enrich your Style of Teaching

## INTERACTIVE PEN DISPLAYS

### Wacom Co. Ltd. JAPAN

#### CLASSROOM

- Teacher maintains eye contact with student without obstructing their view of the content
- Teacher can either sit or stand while teaching - product can be installed on a table or mounted on a lectern
- Built-in USB ports - for teacher to share content using a pen - drive (useful

#### DISTANT EDUCATION

- Annotate, draw, highlight and explain content in detail using the power of a digital pen
- Using additional software, both text and voice content can be recorded for future use or shared live with remote classroom
- Seamlessly add devices such as a USB micro-phone, USB camera for enhanced

#### CONTENT CREATION

- Easily create content in handwritten format for better and faster understanding
- Add notes and comments to existing content whether in text, pictorial or handwritten format
- Ideal tool for creating both content and handwriting based study material

136" MAGNIT All-in-One Micro LED Display

171" All-in-One 21:9 LED Display

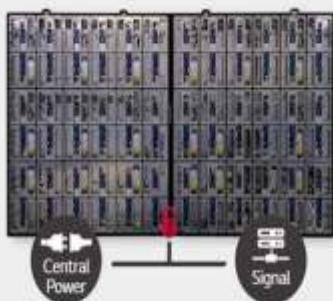

## 136" (P1.5) / 163" (P1.8) All-in-One Direct View LED with webOS™ Controller, & Built-in Speaker

### Easy Installation

The installation process of the All-in-One Smart series is very simple. After securing cabinets (two for LAEC015, three for LAEC018), attach each LED display module to them. Lastly, plug in the power cable. This simple installation saves time and labor, thereby making users handle the LED screen with ease.

① Secure cabinets after connecting main power/signals.

② Attach LED modules to cabinets.

③ Connect the power cable.

### TR3DK-BM

Display	Inch	98" / 86" / 75" / 65" / 55"
	Native Resolution	3,840 x 2,160 (UHD)
	Brightness (w/o Glass)	440 nit (Max.), 390 nit (Typ.)
Touch	Multi-Touch Point	Max. 40 Points
Software	OS Ver.	Android 13 (EDLA)
Connectivity	Input	HDMI (3, HDCP2.2), RGB (1, VGA), Audio (1), RS-232C (1), RJ45 (1, LAN), USB 3.0 Type A (4), USB 2.0 Type A (1), USB Type-C (1, USB-PD, DP-Alt)
	Output	HDMI (1), Audio Out (1, Optical 1 (SPDIF)), Touch USB (2), RJ45 (1, LAN)

### CREATIVE WHITEBOARD SOLUTION

#### Multi-touch

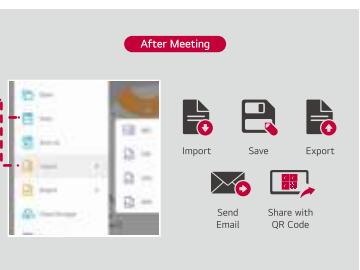

LG CreateBoard can simultaneously detect up to 40 points for multi-touch functionality. With a lifelike board touch experience, it allows people to write and touch at the same time, making it easy to collaborate and share ideas with teammates. This boosts efficient interaction in group activities or meetings.

\* A max of 32 points are recognized in the Android environment, and a max of 40 points are detected in the Windows environment.

#### Easy to Save / Import / Export

LG CreateBoard includes simple import and export functionality. Resources can be saved and imported directly to and from Google Drive or OneDrive, and files can be imported from a USB drive (Users can browse resources saved on USB storage). After the meeting, users can easily save and export content through a simple touch. Additionally, users can directly send it via email to share with others or transfer the data to a personal device by scanning a QR code.

21:9 Wide Screen

Remote Device Management

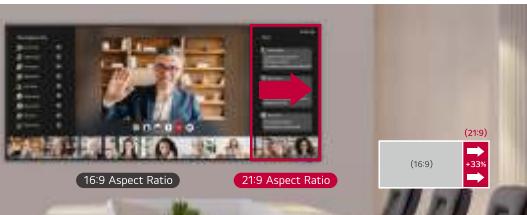

Ultra High Resolution

Wireless ScreenShare

### 105BM5P

Size	105"
Resolution	5,120 × 2,160 (5K)
Brightness	440 nit (Typ.), 385 nit (Min.)
Product Size	2,490 × 1,074 × 77 mm

### 21:9 Extended Wide Format

With support for a 21:9 widescreen aspect ratio, 105BM5P provides an immersive viewing experience with the wider screen than 16:9 display. Its screen specialization helps display 21:9 content including widescreen videoconferencing platforms with the natural details.

### Portrait / Landscape Mode

The 105BM5P offers versatile usage, with the ability to be used in both vertical and horizontal orientations. This flexibility allows it to adapt to various installation and usage scenarios.

\* The orientation must be manually adjusted when changing the installation direction.

MICRO LED (COB TECHNOLOGY)

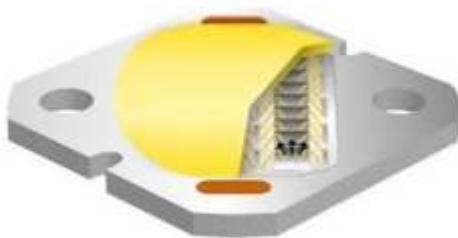

approved next-generation technology

### What are Chip-on-Board ("COB") LEDs?

Chip-on-Board or "COB" refers to the mounting of a bare LED chip in direct contact with a substrate (such as silicon carbide or sapphire) to produce LED arrays. COB LEDs have a number of advantages over older LED technologies, such as Surface Mounted Device ("SMD") LEDs or Dual In-line Package ("DIP") LEDs. Most notably, COB technology allows for a much higher packing density of the LED array, or what light engineers refer to as improved "lumen density". For example, using COB LED technology on a 10mm x 10mm square array results in 38 times more LEDs compared to DIP LED technology and 8.5 times more LEDs compared to SMD LED

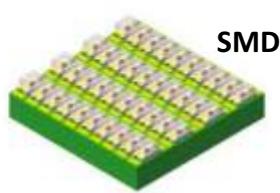

technology (see diagram below). This results in higher intensity and greater uniformity of light. Alternatively, using COB LED technology can greatly reduce the footprint and energy consumption of the LED array while keeping light output constant. For example, a 500 lumen COB LED array can be many times smaller and consume substantially less energy than a 500 lumen SMD or DIP LED Array.
